

It is true that heating with a heat pump or a solid fuel boiler will be cheaper by PLN 500-600 per year, but a question arises: when will the extra investment in such systems pay off?

Complete installation costs for the Red Snake system for a 120 sq m house are PLN 10,000 – 15,000.

The savings are approximately PLN 15,000 in relation to gas heating (connection, boiler, chimney, hydraulics) and at least **PLN 30,000 in relation to a heat pump.**

We recommend using the savings for a solar power station which, in combination with the Red Snake system, makes cost-free heating possible.

Summary of benefits

SAVINGS

- ♥ cheaper by PLN 15,000 – 30,000 than other heating systems
- ♥ utility cost comparable to gas systems and up to 50% lower than in traditional electric systems
- ♥ when combined with solar energy allows cost-free heating.

HEALTH

- ♥ with good ventilation eliminates fungal and mouldy bloom
- ♥ infrared, called the "life energy" favourably affects the body functions (more on this – Q see: infrared and health)
- ♥ friendly to people with allergies, prevents dust drifting

COMFORT

- ♥ very short time of heat-up
- ♥ easy control of temperature and heating time in each room, also via a smartphone
- ♥ unlimited possibilities of room arrangement
- ♥ fast and easy installation
